

# Fast Seal

PREVENTION. PROTECTION. PEACE OF MIND.

## indicative seal

## Versatile Pull-tight Seal With Metal Locking

1. The Fast Seals are etched with permanent laser marking for name, logo, sequential numbers & barcode. Laser marking offers the highest level of security as it cannot be removed and replaced.
2. Heat staking technology is used to permanently fix the cap to the Fast Seal. Heat staking cannot be cut or forced open without leaving clear evidence of tampering.
3. A floating metal clip is securely shielded by a cap providing great locking strength and security.
4. Durable Nylon or PP securing strap gives the user choice of strength to match different applications.
5. Colour coding is made possible by using combinations of multi-coloured seals and multi-coloured caps.

## Specifications

| Product       | Material              | Locking Length | Strap Diameter | Pull Strength         | Marking Area       | Max Marking Digits |
|---------------|-----------------------|----------------|----------------|-----------------------|--------------------|--------------------|
| Fast seal 5"  | Polypropylene / Nylon | 125mm          | Ø 2.3mm        | 18kg (PP) / 21kg (NY) | Flap : 15mm x 30mm | 8                  |
| Fast seal 8"  |                       | 200mm          | Ø 2.3mm        | 18kg (PP) / 21kg (NY) | Flap : 15mm x 30mm | 8                  |
| Fast seal 10" |                       | 250mm          | Ø 2.3mm        | 18kg (PP) / 21kg (NY) | Flap : 15mm x 30mm | 8                  |
| Fast seal 12" |                       | 300mm          | Ø 2.3mm        | 18kg (PP) / 21kg (NY) | Flap : 15mm x 30mm | 8                  |

| INNER CARTON |                                |                  |                               | OUTER CARTON |                        |                  |                               |

**Standard Colours** blue, green, red, yellow & white

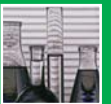

## Versatile Pull-tight Seal

The Fast Seal is a relatively strong seal despite of its small dimensions. This is partly due to the metal locking mechanism, which secures the seal.

The Fast Seals are available in either Polypropylene (PP) or Nylon. The characteristics of Nylon material make it stronger and has a better pull strength than PP material.

The Fast Seals are easy to use for all applications with small sealing facilities e.g. cassettes for ATM machines and money boxes where the Fast Seals are widely utilised.

**Be assured of better security with our innovative use of materials and industrial design.**
